

WEANTINOGE
HERITAGE LAND TRUST

COBBLE BROOK VISTA PRESERVE

TRAIL MAP

Yellow Trail (2.5 miles)

The recommended route, once reaching the loop junction, is clockwise as it is safer to climb the steeper route and descend the gentler way.

Blue Trail (0.15 miles)

Connector trail creating the "lower loop"

Orange Trail (1.4 miles)

This challenging trail includes some very rocky steep slopes. Look for chestnut oaks, a long ago engraved American beech tree, and side by side charcoal mounds.

Weantinoge protects over three hundred acres in the Cobble Brook Valley. The trail offers instant gratification as well as a longer exercise up the steep wild flanks that rise above Cobble Brook. The trail passes through a beautiful wildflower meadow along the Brook before heading up into the forest. Hikers can opt for a shorter loop using the blue trail or continue the ascent along the yellow and orange trails. Those reaching the ridgeline will be rewarded with a perch in the mountain laurel with views to the west across the Housatonic River.

PARK AT: 26 Studio Hill Circle, Kent, CT 06757

Please respect flora, fauna, and neighboring properties by staying on the trail.
